

METHOD OF ON-LINE AUCTIONING FOR LEASES

ABSTRACT OF THE DISCLOSURE

The present invention is a reverse auction/lease and review/evaluation method to be used on the Internet. The method permits quantitative analysis of competitive leasing offers according to financial fundamentals and lessee defined qualitative variables and their relative weighting. The invention includes multiple Internet displayable screens which depict and permit inclusion of quantitative and qualitative variables as defined by the lessee. The invention also includes a scoring system by which the lessee can objectively and quantitatively measure competitive bids of prospective lessors participating in a reverse auction conducted on the Internet.
